BIG ADVANTAGES

BUILT FOR 24/7 OPERATION

Rulomatik vending machines are designed for continuous operation, day and night. They can remain available to customers 24 hours a day, 7 days a week, including weekends and public holidays.

ENERGY-EFFICIENT 12V SYSTEM

Rulomatik vending machines operate with a low-voltage 12V electrical system designed to support reliable, continuous operation with low energy consumption.

ADVANCED TECHNOLOGY

Rulomatik combines proprietary engineering, electronic systems and smart vending technologies developed through years of manufacturing experience. Continuous product development allows our machines to evolve in performance, reliability and user experience.

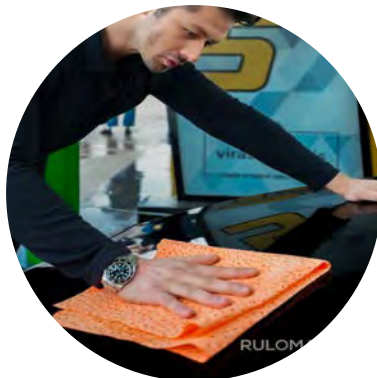

3 IN 1 TOWEL PERFORMANCE DRYING • CLEANING • POLISHING

Rulomatik microfiber car drying towels are developed for professional vehicle care. Their microfiber structure provides effective drying while also supporting cleaning and polishing applications.

RESPONSIBLE PRODUCT DESIGN

Rulomatik continuously works to improve material efficiency, product durability and responsible manufacturing practices across its vending machines and towel product range.

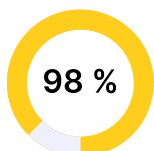

WARRANTY LONG-TERM SUPPORT

Rulomatik vending machines are covered by a 2-year manufacturer warranty. Spare parts and technical service support are available for up to 10 years, supporting long-term operation and investment continuity.

24/7 automatic sales

The number of Rulomatik vending machines in the world.

HOW DOES IT WORK

Rulomatik vending machines provide 24/7 sale of microfiber car drying towels, car mats, sports towels, beach towels, worship products and many other products that we specially give away by coins, tokens or other payment methods.

Rulomatik vending machines, produced in accordance with international production standards, have been updated as A, B, C, D and E series in accordance with the constantly developing technology since the day we started their operations.

Rulomatik which sharing its production power with the whole world never compromises its superior performance even at temperatures between -40 and +60 degrees.

It is a fleet of vending machines that work automatically with payment methods compatible with the currencies of more than 200 countries and give disposable products in return.

Our vending machines automatically sell disposable inner chamber products (microfiber drying towels of colourful perfumed car mats or sports towels or beach towels or worship products) specially produced by the textile engineers within Rulomatik to their customers.

Car Drying Towel Vending Machine Places of Usage:

Wherever there are cars, there are car wash areas. Wherever there are car wash areas, there may be Rulomatik microfiber car drying towels vending machines.

The following are the ways of washing cars that vary from country to country and some of the locations that you should prioritise in your potential market.

Self service wash locations

Wash point
